ADVANCEMENT IN PERMANENT LIP AUGMENTATION!!

Getting tired of returning to the office for Restylane injections for fuller lips? Well, a new device that was recently FDA approved for orbital reconstruction is being used in an off-label capacity for lip enhancement. It consists of a very thin outer sheath with an inner silicone layer that, once placed in the lips, is filled with saline. The procedure is performed in the office under local nerve block anesthesia and takes approximately 20 minutes.

Dr. Lille reports that, "the other permanent products such as cadaver skin grafts may give a natural appearance but the absorption rate can be high. The other implant, Gortex graft, tends to be firm and immobile with patients complaining of feeling the graft." The saline filled implant, on the other hand, is very soft and moves well with the lip to produce a result that looks and feels very natural. Bruising from the procedure can last from 3 - 7 days with swelling potentially persisting up to 1 month.

DIFFICULTY RESHAPING YOUR ABDOMEN AFTER BABIES?

Do you find that loose skin, a belly that "sticks out" and some hip fat just can't be solved with diet and never-ending abdominal crunches? Don't feel guilty. No matter what diet or how many "bootcamp" exercises you undertake, the anatomical changes brought about by the tremendous blessings of child-bearing are in some patients irreversible.

Before
Abdominoplasty

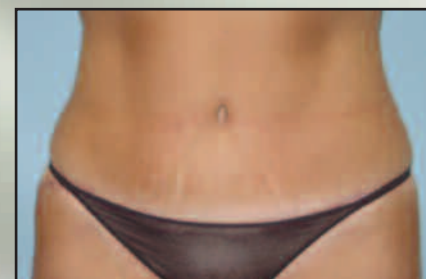

THE SOLUTION – An Abdominoplasty removes excess skin, tightens the abdominal wall and reshapes the hips to give back your hour-glass figure.

WALK FROM OBESITY
