MEN ARE TURNING BACK THE CLOCK

Men may look at women who have had facelifts and wonder if they can turn back the clock while still looking natural. Dr. Lille explains the male face must be approached differently than a women's since it possess different characteristics. The same techniques performed on a woman may result in a "pulled", unnatural look on a male.

Dr. Lille has perfected minimally invasive techniques on the male patient, such as the transforehead brow lift, naso-labial crease excision, and the midline neck Z-plasty, which have a dramatic impact and relatively quick recovery period.

IS YOUR FAT IN THE WRONG PLACE?

As we age, facial fat often begins to atrophy, giving the face a gaunt or tired look. Facelift procedures sometimes are not enough, but fat grafts are ideal fillers and can achieve the desired youthful results. The donor sites are usually from the lower abdomen, knees or on the side of the thighs. The fat is moved from where you don't want it to where you do.

Call 480-661-6197 for a consultation with Dr. Lille on these or any other procedures you may have.
